VISION

To be a model nationwide program in technological and values-based education, transforming public school education in Honduras by providing students with the tools they need to face the challenges of the 21st century with knowledge, ethics, and confidence.

We're committed to narrowing the digital gap, while helping shape responsible citizens and capable of building a prosperous and just future for our country.

Computer Classes

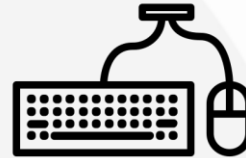

1

Identifying the basic parts
of a computer

2

Learning to use
keyboard and mouse
